

ENGINE STOP LEAK

EXTENDED LIFE

Technical Data Sheet

ELIMINATES OIL LEAKS WHEN ADDED TO MOTOR OIL

iLast Engine Oil Stop Leak is a specially formulated oil additive designed to reduce or eliminate oil leaks from old worn seals and gaskets that have shrunk due to temperature or wear. Elastomeric seals contacted by hot oil tend to shrink, harden and become less pliable; as a result oil begins leaking out. One alternative is to replace all the leaking seals; another is to add iLast Engine Oil Stop Leak. iLast Engine Oil Stop Leak contains a synthetic seal swell additive to swell seals back to their original size and helps them regain pliability. This product contains no solids that can plug oil filters and small engine oil passageways.

**MADE
IN USA**

Typical Properties

| | |
|------------------|-------------------|
| Flash Point | >200 °F |
| Boiling Point | >400 °F |
| Specific Gravity | .9 |
| Appearance | Clear, Red Liquid |
| Odor | Mild Petroleum |
| Flammability | Low Flammability |
| Plastic Safe | Yes |
| Propellant | Not Applicable |

Typical test data are average values only. Minor variations, which do not affect performance, may occur. As always, you should consult your owner's manual to verify the proper fluid recommendation for your particular vehicle.
